Cummings/Riter's regulatory compliance management services are designed to support clients in keeping pace with complex and interrelated environmental regulations. One of our greatest strengths is our skill as regulatory agency liaisons. As advocates for our clients, our goal is to ensure that the demands placed on our clients are fair, realistic and achievable.

Cummings/Riter's staff includes an interdisciplinary group of engineers, geologists and scientists, with several key individuals having responsibility for ongoing review of changes in state and federal requirements. Our clients receive the benefit of the effective working relationships our personnel have developed over time with regulators at both state and federal levels.
